Kurval BV uses security software, such as an antivirus scanner and a firewall, to protect your personal data and uses a VPN connection for internet browsing. The website has a TLS certificate (formerly SSL), which means that when you complete the contact form, your personal data is sent via a secure internet connection (indicated by the padlock and the addition "https" in the address bar). Our website's host uses the additional security feature DNSSEC (in addition to DNS) to convert a domain name to its associated IP address; it is provided with a digital signature that you can automatically verify. This prevents you from being redirected to a false IP address. Our email host also uses the three internet standards DKIM, SPF, and DMARC to prevent you from receiving emails in our name that contain viruses, are spam, or are intended to collect personal (login) data.

## **Cookies**

The website [www.kurval.nl](http://www.kurval.nl), owned by Kurval BV, does not use cookies or similar technologies.
